Orangemen Laugh at Threat To Close Irish Post Offices

Consider that Secretary Robertson Threatened to Do an Impossible Thing—British Government Would Not Allow Action Without the Place—London Authorities Say He Must Have Had Ministerial Authority—Such a Procedure Would Be an Act of War.

LONDON, Sept. 27.—Orangemen laugh at the threat of John Macdonald, secretary of the British Government, to close Irish post offices. The British Government, they declare, would not allow action without the place. London authorities say he must have had ministerial authority—such a procedure would be an act of war.

Robertson, parliamentary secretary to the board of trade, had ministerial authority for his speech at Newcastle on Wednesday, when he threatened to close Irish post offices. He said that if any attempt is made to set up a provisional government in Ulster, after the passage of the Home Rule bill, the government will withhold the mails from Ulster and thus totally disorganize business in Ireland by isolating that province from the rest of the world. Such a measure would be to all intents and purposes an act of war.

"The Daily Mail" recalls that in 1881, when the southern states of America proclaimed their independence, Lincoln was urged to withhold the mails, but he declined on the grounds that such conduct on his part would be provocative. "The action which Lincoln would not take against the states which deliberately seceded," says the Daily Mail, "Mr. Asquith apparently intends to employ against a million of British citizens whose only crime is that they desire to remain in the United Kingdom and are unwilling to be driven out of it to please Mr. Robertson."

Chief Figures Confer.
The premier and Mr. Lloyd George are said to meet this week-end at Brodick Castle, Isle of Arran, the home of the liberal whip. The probability of a meeting between the two chief figures in the government and the men who are the chief figures in the opposition is the subject of much speculation.

In addition to Mr. Asquith, a number of liberal members of parliament have been conducting investigation in the centres of unrest throughout the country. The investigation is being conducted in a very discreet manner. It is believed that the investigation is being conducted in a very discreet manner. It is believed that the investigation is being conducted in a very discreet manner.

Literally An Act of War.
London, Sept. 27.—There is good reason to believe that John Macdonald

Strict Life Saving Rules Will be Enforced by the Government

Committee Appointed for Drafting of New Rules for all Passenger Boats Plying on all Waterways. Equipped Boats to Carry All Passengers to Points of Safety With Sufficient Provisions to Last Them for a Definite Length of Time.

Ottawa, Sept. 27.—When on April 1st next the session is held to draft regulations governing navigation for the year 1914 passengers on foreign-going coasting and inland vessels registered in Canada will travel under the knowledge and sense of security that their lives are protected by the strictest life saving rules ever enforced in the history of Canadian navigation.

The board of steamship inspection has just concluded drafting life saving rules for all Canadian vessels which contain radical changes from the old order of things, and which, if enforced by the government and strictly enforced, will make sea travel as safe as an intelligent supervision by the government. The new regulations are the result of the world-wide demand for reform in the life saving rules following the disaster, and will go into force at the opening of navigation next spring.

Particularly important are the changes with regard to vessels constructed to carry passengers. The first law laid down in respect of these is that they be required to carry life boats in such number and of such capacity as shall be sufficient to accommodate the total number of persons which the ship is certified to carry.

The captain or owner of a foreign going ship, before it clears from port, must declare before the collector or other chief officer of customs that the ship is actually carrying the full complement of life boats to accommodate all persons that will be carried at any time during the voyage to foreign ports and back again to Canada; the appliances for launching the lifeboats must be of such a character that the lowering into the water can be done speedily, efficiently and safely.

One approved life jacket shall be provided for each passenger. The life jackets further provide that all life boats shall be efficiently equipped and in the case of foreign going vessels shall be fully supplied with provisions, food, and other necessities for the voyage, and with appliances which will make for the greatest possible comfort of occupants.

One approved life jacket shall be provided for each passenger. The life jackets further provide that all life boats shall be efficiently equipped and in the case of foreign going vessels shall be fully supplied with provisions, food, and other necessities for the voyage, and with appliances which will make for the greatest possible comfort of occupants.

Examples of Ramsey Values in Men's Furnishings

Knitted Neckwear 35c
Men's imported silk knit Ties—knitted of fine silk thread in all popular shades—the correct width and shape. 3 for \$1.00, or each 35c

Men's Underwear
Men's Shirts and Drawers, natural color, good warm fleece lining. All sizes 34 to 44. Very special value at the garment 50c

Wool Combinations
Penman No. 95 wool combination in natural shade. Correct weight for present wear. Sold most everywhere for \$2.50. Our price \$2

Police Chief and Detective Made Defendants in Case

Frank T. Williams, a Resident of B.C., Who Was Arrested Here This Month, Sues Detective John Shaw for \$596 Which Plaintiff Claims Was Wrongfully and Unlawfully Appropriated—Aftermath of Crime Game.

A rather sensational aftermath of a British Columbia die game was produced this morning when a writ was issued against Detective John Shaw, of the city police, and the city of Vancouver, for \$596. The writ was issued by the British Columbia Supreme Court, and the case is now on for trial. The writ is for the recovery of \$596, which is the amount of a fine imposed on the plaintiff, Frank T. Williams, for a crime game. The plaintiff claims that the fine was imposed wrongfully and unlawfully, and that he is entitled to recover the amount of the fine. The case is now on for trial, and the plaintiff is seeking a judgment in his favor.

On September 24th of this year Frank Thomas Williams, the plaintiff, made application to have this money refunded which is alleged to have been expended by the City Police in connection with the crime game. Williams is now bringing suit to recover this money.

On behalf of Williams, Joseph A. Clarke, counsel for the plaintiff, made application to have this money refunded which is alleged to have been expended by the City Police in connection with the crime game. Williams is now bringing suit to recover this money.

On behalf of Williams, Joseph A. Clarke, counsel for the plaintiff, made application to have this money refunded which is alleged to have been expended by the City Police in connection with the crime game. Williams is now bringing suit to recover this money.

To go out to the new town, "Summerland," on Sunday, Sept. 29th, at 10 a.m. and 2 p.m. Tickets \$1.00, \$1.50, \$2.00, \$2.50, \$3.00, \$3.50, \$4.00, \$4.50, \$5.00, \$5.50, \$6.00, \$6.50, \$7.00, \$7.50, \$8.00, \$8.50, \$9.00, \$9.50, \$10.00, \$10.50, \$11.00, \$11.50, \$12.00, \$12.50, \$13.00, \$13.50, \$14.00, \$14.50, \$15.00, \$15.50, \$16.00, \$16.50, \$17.00, \$17.50, \$18.00, \$18.50, \$19.00, \$19.50, \$20.00, \$20.50, \$21.00, \$21.50, \$22.00, \$22.50, \$23.00, \$23.50, \$24.00, \$24.50, \$25.00, \$25.50, \$26.00, \$26.50, \$27.00, \$27.50, \$28.00, \$28.50, \$29.00, \$29.50, \$30.00, \$30.50, \$31.00, \$31.50, \$32.00, \$32.50, \$33.00, \$33.50, \$34.00, \$34.50, \$35.00, \$35.50, \$36.00, \$36.50, \$37.00, \$37.50, \$38.00, \$38.50, \$39.00, \$39.50, \$40.00, \$40.50, \$41.00, \$41.50, \$42.00, \$42.50, \$43.00, \$43.50, \$44.00, \$44.50, \$45.00, \$45.50, \$46.00, \$46.50, \$47.00, \$47.50, \$48.00, \$48.50, \$49.00, \$49.50, \$50.00, \$50.50, \$51.00, \$51.50, \$52.00, \$52.50, \$53.00, \$53.50, \$54.00, \$54.50, \$55.00, \$55.50, \$56.00, \$56.50, \$57.00, \$57.50, \$58.00, \$58.50, \$59.00, \$59.50, \$60.00, \$60.50, \$61.00, \$61.50, \$62.00, \$62.50, \$63.00, \$63.50, \$64.00, \$64.50, \$65.00, \$65.50, \$66.00, \$66.50, \$67.00, \$67.50, \$68.00, \$68.50, \$69.00, \$69.50, \$70.00, \$70.50, \$71.00, \$71.50, \$72.00, \$72.50, \$73.00, \$73.50, \$74.00, \$74.50, \$75.00, \$75.50, \$76.00, \$76.50, \$77.00, \$77.50, \$78.00, \$78.50, \$79.00, \$79.50, \$80.00, \$80.50, \$81.00, \$81.50, \$82.00, \$82.50, \$83.00, \$83.50, \$84.00, \$84.50, \$85.00, \$85.50, \$86.00, \$86.50, \$87.00, \$87.50, \$88.00, \$88.50, \$89.00, \$89.50, \$90.00, \$90.50, \$91.00, \$91.50, \$92.00, \$92.50, \$93.00, \$93.50, \$94.00, \$94.50, \$95.00, \$95.50, \$96.00, \$96.50, \$97.00, \$97.50, \$98.00, \$98.50, \$99.00, \$99.50, \$100.00, \$100.50, \$101.00, \$101.50, \$102.00, \$102.50, \$103.00, \$103.50, \$104.00, \$104.50, \$105.00, \$105.50, \$106.00, \$106.50, \$107.00, \$107.50, \$108.00, \$108.50, \$109.00, \$109.50, \$110.00, \$110.50, \$111.00, \$111.50, \$112.00, \$112.50, \$113.00, \$113.50, \$114.00, \$114.50, \$115.00, \$115.50, \$116.00, \$116.50, \$117.00, \$117.50, \$118.00, \$118.50, \$119.00, \$119.50, \$120.00, \$120.50, \$121.00, \$121.50, \$122.00, \$122.50, \$123.00, \$123.50, \$124.00, \$124.50, \$125.00, \$125.50, \$126.00, \$126.50, \$127.00, \$127.50, \$128.00, \$128.50, \$129.00, \$129.50, \$130.00, \$130.50, \$131.00, \$131.50, \$132.00, \$132.50, \$133.00, \$133.50, \$134.00, \$134.50, \$135.00, \$135.50, \$136.00, \$136.50, \$137.00, \$137.50, \$138.00, \$138.50, \$139.00, \$139.50, \$140.00, \$140.50, \$141.00, \$141.50, \$142.00, \$142.50, \$143.00, \$143.50, \$144.00, \$144.50, \$145.00, \$145.50, \$146.00, \$146.50, \$147.00, \$147.50, \$148.00, \$148.50, \$149.00, \$149.50, \$150.00, \$150.50, \$151.00, \$151.50, \$152.00, \$152.50, \$153.00, \$153.50, \$154.00, \$154.50, \$155.00, \$155.50, \$156.00, \$156.50, \$157.00, \$157.50, \$158.00, \$158.50, \$159.00, \$159.50, \$160.00, \$160.50, \$161.00, \$161.50, \$162.00, \$162.50, \$163.00, \$163.50, \$164.00, \$164.50, \$165.00, \$165.50, \$166.00, \$166.50, \$167.00, \$167.50, \$168.00, \$168.50, \$169.00, \$169.50, \$170.00, \$170.50, \$171.00, \$171.50, \$172.00, \$172.50, \$173.00, \$173.50, \$174.00, \$174.50, \$175.00, \$175.50, \$176.00, \$176.50, \$177.00, \$177.50, \$178.00, \$178.50, \$179.00, \$179.50, \$180.00, \$180.50, \$181.00, \$181.50, \$182.00, \$182.50, \$183.00, \$183.50, \$184.00, \$184.50, \$185.00, \$185.50, \$186.00, \$186.50, \$187.00, \$187.50, \$188.00, \$188.50, \$189.00, \$189.50, \$190.00, \$190.50, \$191.00, \$191.50, \$192.00, \$192.50, \$193.00, \$193.50, \$194.00, \$194.50, \$195.00, \$19

Extracts From Paper Delivered by Dr. Whitelaw at Recent Congress in Regina Proves Interesting Owing to the Fact that Much of the Information Contained therein Can Be Used at Home—Scholarly Address Proved Very Instructive.

at the Pasteur Institute, Paris, clients are each cared for in a private ward opening to a common hall. The same nurses go from case to case. In two and a half years there were treated 2,000 persons of whom 1 had smallpox, 443 diphtheria, 16 measles, 163 cryptosporid, 92 scarlet fever, and 166 non-diphtheritic sore throat. During this time the only

ILLUSTRATIONS SHOWING HOW COAL IS MINED AND STORED FOR DELIVERY IN EDMONTON.

\$46,000 BYLAWS PASSED
Estevan, Sask., Sept. 27—Bylaws authorizing nearly \$46,000 providing for standard street lighting, extension to power plant and light service and sewer extension were today passed by large majorities and work will be rushed to completion this fall.

Patients must also be provided, and assessed of a high degree of intelligence. The first cost and expenses of management must therefore be high in comparison with general hospitals, and they are to be effective and fulfil all the conditions I have outlined as essential.

"Whether the plans here shown will really be acted upon, though endorsed by our board of health and a committee of the city, is uncertain, as, as the newly constituted hospital board of our city may be persuaded to adopt the pavilion principle in preference.

"The ideal to be reached, whatever the hospital is decided upon by a city, is that— which, most wisely permits of the absolute isolation of the patient, at least during the late stage."

**\$150,000 WILL
BE EXPENDED
ON BIG PLANT**

Medicine Hat, Sept. 27.—Construction work has started this week on the foundations for the new factory here on the Saskatchewan Bridge and Iron Company, limited, on the West Industrial site, this being the first industry to build at that location. The first building will be 300x130 feet and 40 feet in height, and will be constructed of steel and iron. About \$150,000 will be expended in the plant, which will require some 130 tons of steel for the building alone. This is now being prepared at the company's plant at Moose Jaw, and is nearly ready for shipment to Medicine Hat. The company's output will consist of structural steel and heavy girders for general bridge and construction work.

Been Operating for Two Years

For nearly two years this concern has been operating at Moose Jaw, and the business has increased so rapidly that more room was required, and the decision was arrived at a short time ago to build a new plant at Medicine Hat, where more economical manufacturing could be done and where it would have ample room for expansion. Arrangements were made with the city for certain concessions and for some lighting, but work has been prosecuted on those lines to the site of the new factory, west of the city. When in full running operation, the company will give employment to 150 men. The plant is little doubt, but that this force will be increased, owing to the increasing demand for the products of the concern. Operating here at a cost of 30

MAGNET OF LOW-PRICED LAND

McLeod, Sept. 27.—In explanation of the big movement of American settlers into Southern Alberta during the past two or three weeks, it is pointed out that this section of the west is now receiving an extensive amount of favorable publicity from American farmers who came here a year or more ago and who have since then begun urging their former neighbors and townsmen in the States to come and do likewise. The bulk of the new arrivals at the present time are coming from Illinois, Iowa and Nebraska, and are all experienced farmers and stock breeders who have done well in the States, but who are quick to seize an opportunity to better their circumstances.

NO IMPROVEMENT TAX

Vancouver, Sept. 27.—The statement that there is to be return to the tax on improvements in this city is absolutely without foundation. The question never has been before the finance committee or the city council and there is not the slightest

per cent, less than in Moose Jaw. George Harrison, the manager, is confident that the company will do much better here than in the Saskatchewan city, especially with the increased call for the output all through the prairie provinces.

The Saskatchewan Bridge and Iron company has a capital of half a million dollars, with James E. McClellan as president; H. D. Plekett, barrister and president of the Moose Jaw Board of Trade, vice-president; George Harrison, managing director; and E. G. S. Bennett, secretary-treasurer. The prospects are that this will grow to be one of the most important industries in Medicine Hat.

♦ Sufficient Coal is Now Blocked Out in a Number of Local Mines to Provide Fuel for City With a Population of a Quarter of a Million People—Coal Mining and How it is Done Interestingly Described.

A trip of inspection through any of the coal mines surrounding Edmonton should be sufficient to convince any one that the coal industry is in a position in the way of fuel for a city with a population of at least a quarter of a million people. The coal mines known even by those who claim Edmonton as their home city that there are beneath the surface. It is one of the things that the city fathers and the city's officers see to that prospective settlers and interested public men who come to the city may only get a glimpse of a look into one or more of the coal mines either within or surrounding the city.

Owing to the convenient location of the Trent City Coal company's property adjacent to the main highway, the mines are often visited by those interested in the coal industry. The coal is mined by the Trent City Coal company on two levels. The first seam of coal is located at a depth of 167 feet below the surface and is about 4 1/2 feet in width. The second seam is located 167 feet below the surface and is about 6 1/2 feet in width. The main entry for the second level has been opened up for a distance of 3,000 feet and the company driven off every 800 feet. Five of these cross entries have already been completed and a total of 3 1/2 feet from the main entry other parallel un-

When the entire property, consisting of 366 acres, has been blocked out in this method on the second level, the entire coal deposits will be mined. It is estimated that there is sufficient

coal on this level to keep the company mining for a period of 18 years. The property is located about 100 ft. below the surface and the thickness of the coal is increased to about 100 feet. The quality of the coal on this level is first class and the company has been supplying the city power plant with a number of cars daily under contract.

The coal is mined by the use of radial cutters, muckers and conveyor belt machines. It is possible to cut into the

London, Sept. 27.—The success of the city of Ottawa has caused the city to purchase 100,000 tons of coal circles here. The amount of the loan, for one thing, was small, and Ottawa, for another, was not a coal city.

It is gratifying to learn that the outlook for Canadian exporters here is not so much improved, but there will certainly be a considerable increase in sales this autumn. Accordingly some intending Canadian borrowers will doubtless receive advice to wait a while.

At a distance of two feet and to a depth of four feet, the miners dug a cut about four inches in width. The coal is then blasted out with the aid of dynamite. The miners then haul the miners, loaded into mine cars and hauled and dumped into the bins above the surface. The miners usually work in eight hour shifts, three shifts being required to produce the four million tons of coal on a contract basis and make an average of from \$1.00 to \$3.00 per day.

The question of the proper ventilation of a coal mine is the one that does not seem always apparent to the average citizen, who usually has the idea

An important issue appeared recently in the case of the United States vs. the Illinois Coal and Coke Co., involving a ruling of four per cent. Dominion stock at \$95. This is the first four per cent. Dominion stock ruling in the government for many years but it, like any other ruling, is not without its basis. The price here is generally considered to be a fair one. It is doubtful if any other Dominion stock will come within two cents of that price.

It is interesting to note that the Calumet city are renewing their loan of treasury bills dated September 30, 1914, and the city has already placed a small amount of bills at the same rate.

make the prevalence for a certain amount of gas in the coal must make the underground work very unhealthy. At the Twin City mine the ventilation is produced by a Sheldon fan operated at the top of the air shaft. This fan circulates 25,000 cubic feet of air per minute through the underground work.

Ottawa, Sept. 27.—It is announced that the appointment of a commission to create a great federal district including the cities of Ottawa and Hull, and the surrounding country for improvement, commission which has been authorized by the government, is now on the work of beautifying the capital for the past 15 years will go out of existence.

The present equipment of the Twin City Mine is being doubled by the installation of a new compressor, 115 new mine cars and complete mine shafts, bringing the daily output up from 250 tons to 500 tons. The new compressor has a capacity of 600 feet of free air per minute and this will be sufficient to operate four of the

When the coal is loaded into the mine cars by the miners it is hauled to the shaft by horses along a narrow track. The horses used for this work are stabled continuously underground where very comfortable stables are provided for them. The mine is electrically lighted and the

city water is piped down to the stables for the horses. Everything is made so comfortable for the animals in the coal mines that they appear to be in better condition than those working on the surface.

Where carloads are required the cars are lined up on sidings, built into the property and from a chute above

The coal is loaded into them. A set of these Standard railroad scales is located at the end of the railway tracks adjoining the shaft head, and as the cars are loaded they pass over these scales and the weight of every carload of coal is thus accurately recorded.

When the coal is hoisted from the mine it passes up to a platform above the empty cars where it is dumped and passes down through a series of

Winnipeg was to float a \$12 million loan this year to finance the Shou kai water supply scheme. French financiers have asked, through the Canadian commission in Paris, for the privilege of bidding for it. If successful, The loan will not be floated this year, and when it is, will go to the money market offering the best terms,

OTTAWA'S LOAN WAS SUCCESS

High Credit of Capital City
Enable Authorities to Dis-
pose of Bonds.

London, Sept. 27.—The success of the city of Ottawa loan has caused but little surprise in Canadian financial circles here. The amount of the loan, for one thing, was small, and Ottawa's credit is among the highest.

It is gratifying to learn that the outlook for Canadian securities here is somewhat improved, but there will certainly be a lot of big home flotations this autumn. Accordingly some intending Canadian borrowers will doubtless receive advice to wait a while.

An important issue appeared recently comprising three millions sterling, the war per cent. Dominion stock at 99. This is the first four per cent. loan floated by the Canadian government for many years but it, like most of the other dominions, is now obliged to adopt the four per cent. basis. The price here is generally considered to be low, but it is doubtful if any other dominion could have come within two pence of that price. The bank of Montreal is issuing.

Calgary city are renewing their loan of treasury bills due September 30 at about six per cent. Regina has also placed a small amount of bills at the same rate.

**NEW COMMISSION HAS
EXCLUSIVE CONTROL**
*Will Not Overlap on Work of Ottawa
Improvement Committee But
Will Assist Them*

Ottawa, Sept. 27.—It is announced that the appointment of a commission to create a great federal district including the cities of Ottawa and Hull, does not mean that the Ottawa improvement commission which has carried on the work of beautifying the capital for the past 15 years will go out of existence.

The Improvement commission will continue the work that it has in hand, although in the end it will undoubtedly be superseded in the larger share of its activities by the new and more important body just created.

It is considered likely that the improvement commission will conclude certain schemes or plans already under way and will be ready to assist and co-operate with the new commission in the larger plans of development.

**FRENCH FINANCIERS
AFTER BIG LOAN**
City of Winnipeg Already Has Offers
to Dispose of all of \$13,000,000
Debentures
Winnipeg, Sept. 27. (Herald.)—The

Winnipeg was to float a 13 million dollar loan this year to finance the Shoal lake water supply scheme. French financiers have asked, through the Canadian commission in Paris, for the privilege of bidding for all or part of it. The loan will not be floated this year, and when it is, will go to the money market offering the best terms.

MANY STAR TURNS AT LOCAL PLAY HOUSES

DUTCH GRAMMAR IS HER HOBBY

Miss Laurie Ordway Tells Amusing Story Which Happened to Her in Munich.

If anyone happens to see Miss Laurie Ordway, who is appearing at the Pantages all next week in one of the feature acts, buried in a German grammar, and make enquiries as to the cause, she will probably tell you this tale.

Miss Ordway and a family friend returned once from a trip to the other side, where, among other places, they visited Munich. As neither spoke German they had rather an exciting time with waiters, cabmen, etc. In the hope of learning something about the city, they called upon a waiter to bring them a local guide book and some stationery. This was done, with the aid of a pocket phrasebook, which proved adequate for the stationery, but was of little assistance in aiding the man to comprehend their need of the guide book. Miss Ordway explained explicitly and long in halting German, and with vigorous and energetic gesticulation, but the waiter's face remained blank. Then suddenly a faint glimmer of intelligence seemed to light up his Teutonic countenance and he departed.

After what seemed an endless wait, he returned with the writing paper and a foaming glass of Muenchen. They don't know yet what his idea was unless, perchance, he wanted them to drown their troubles, but Miss Ordway is now preparing for future cautions.

QUICK CHANGE ARTIST COMING

Miss Marion Munson, Who Comes Here Next Week, is Wonderfully Clever.

Marion Munson, vaudeville's newest "lightning change" sensation, supported by Hal Forrest, will offer a preview novelty, called "The Kidnapping of Bianca," at the Pantages Theatre all next week. In telling a pretty story dealing with the romance of a young Italian girl, Miss Munson plays six female characters, changing from one to the other, with such rapidity and completeness of detail, as to make her audience gasp in wonderment—and then to show her versatility she changes back and forth to the characters at will until she has made in all a dozen seemingly impossible transformations. While Miss Munson has no peer among her sex for speed, (many of the changes being made in one second) she has not sacrificed her remarkable work to swiftness, and her remarkable changes of voice and facial expression and forceful acting have caused many to doubt that one and the same person could play all of the characters so perfectly. Mr. Forrest, who is the author of the vehicle, pays the part of a newspaper reporter, his work in the one role helping to bring out the resourcefulness of Miss Munson in portraying six characters.

MARION MUNSON

STAR BILL AT EMPIRE FOR FIRST PART OF NEXT WEEK

Former "Legitimate" in the Person of Miss Kathryn Kidder Who Comes to the West With a Big String of Successes Behind Her Will Feature Bill This Week—Chinese Actors Will Also Cause Big Sensation—Clever Monologist Will Make Many Laughs.

Miss Kathryn Kidder, the distinguished American actress, and the latest of the "legitimate" stars to essay vaudeville, is making her first trip over the Orpheum circuit and will be at the Empire theatre the first half of next week, as the leading attraction of the regular Orpheum bill. Miss Kidder will appear in "The Waterwoman Quakers," a clever condensed version of Sardou's greatest comedy masterpiece, "Madame Sans Gene." Of all Miss Kidder's successful roles, none gained her so much popularity as this, which she introduced to the American stage many years ago. As a matter of fact, Miss Kidder produced the Sardou play in New York even before Rejane produced it in Paris. Few American actresses have had so varied and distinguished a career. For many years she has been a star of the first magnitude in a long list of important plays. Miss Kidder is supported by a specially selected company of actors, and has been given a wonderfully

mounted production. The sketch is a complete and entire play in itself, and not a series of scenes. James J. Morton, the big monologist speaks for himself once more, and the bare announcement is a guarantee of plenty of laughter. Men with the personality of Morton are few and far between and when they get on the vaudeville stage their success is instant and permanent. He is a born comedian with a drill manner and an inexhaustible fund of stories. Four Chinese singers and comedians will provide the big novelty of the bill. The Chinese are great lovers of the theatre, and have many distinguished actors of their own. The Chang Hwa Comedy Four sing both in Chinese and English, but their forte is American comedy, interpreted in their own Oriental way. They wear all sorts of costumes, including even the Highland kilts. The Three Elisons will offer a genuine musical treat in their own setting of Longfellow's immortal poem, "The Village Blacksmith." There is plenty of instrumental novelty in the act, including clever work on the xylophone and instrumental anvils. The act is said to be quite pretentious and very cleverly staged. Flee, Sully and Scott are a trio of funny and wonderfully lively men, who dance and prance about and do many remarkable stunts on the trampoline and rebounding elevated bars. All three are skilled acrobats, but they are also comedians. Della Rossa and Marcello, operatic singers, are so well known in Europe that they are known in all the halls there as international singers, but they are new to American vaudeville, having crossed the Atlantic for the first time this year. They have scored heavily in a peculiarly selected repertoire, which includes the newest operatic hits. Della Rossa is a soprano of magnificent voice, while Marcello has a baritone of great depth and feeling. Lova and De Marie, also from Europe, where they are well-known and popular, offer a novel acrobatic and gymnastic act that has all the finish expected of artists of that kind from the old country. New motion views of the latest events of the day the world over, complete the bill.

ANOTHER ASSET FOR BIGGAR

Biggar, Sask., Sept. 27.—All doubts as to the possibilities of alfalfa as a forage crop for this section of the west would now seem removed by the successful harvesting this season of one of the best alfalfa crops ever grown in Saskatchewan. Dr. S. E. Shaw, the successful grower, is now receiving orders for alfalfa for inoculation purposes, and the coming spring will see many extensive tracts seeded with a view to duplicating the record made this year. Although there is always a ready cash market for alfalfa, it is believed that with the steady increase of mixed farming among local farmers future crops will be fed mostly right at home, with the result of larger and larger profits year by year.

MARIE DAVIDSON

As "Georgiana" in "Jane Eyre," at the Lyceum Theatre all next week.

"JANE EYRE" WILL GRACE LYCEUM BILL

Famous Old Classic, Ever Welcomed by Theatregoers at Lyceum This Week

Jane Eyre Grace Aylesworth
Mrs. Reed Emily Selwyn
Georgina Marie Davidson
Adele Hazel Stone
Lord Rochester Edward Horn
Ernest Rivers B. C. Edwards
Rev. Brocklehurst William Yale
John Reed Barrow Le Paige
Marshall William Davies
That famous old classic with a thrill in every line, "Jane Eyre," will be presented by the Lyceum Players at the Lyceum theatre all next week. It is arranged in five acts, and the same number of scenes. To most readers of popular fiction the plot of this piece is quite familiar. In fact "Jane Eyre" is so universal in its appeal that it gave rise to the aphorism a few years ago that "every person who has perused Shakespeare, however scant, has shed tears with Jane Eyre."

Jane Eyre is a girl of uncertain parentage, who lives at the home of the Reeds at Gateshead Hall. She becomes acquainted with John Reed, a drunken profligate, who insults her. Jane leaves the home of the Reeds and becomes a governess. It is while acting in that capacity that she meets Lord Rochester. He becomes enamored of the little governess, but is in the miserable position of being burdened with a wife, who is a maniac. It is not until the fourth act that Lord Rochester is left free to marry the girl of his choice, when his first wife jumps to her death from the Thornfield Tower. This play abounds in tense situations and thrilling scenes as well as its share of comedy. Performances are played at the Lyceum every Wednesday and Saturday.

See Sun-Weekend only 8:45 a.m. or 2 p.m. See Jasper Ave. E. Free auto trip.

MANY FEATURES BILLED FOR PANTAGES THEATRE NEXT WEEK

Nearly Every Act on the Bill Has Some Special Likeness and Patrons are Assured of One of the Best Shows That Ever Came Over the Circuit—The Extra Special One Though Will Be "The Apple of Paris."

With a cleverly acted pantomime as its feature, the bill at the Pantages all week promises to be above the standard of vaudeville. Cecelia Amato, and her company of ten French artists will appear in the sensational Parisian pantomime "The Apple of Paris." This is an unusual act because it is the version of the whole of the tale. Amato will head the act as Odette, an adventuress. The act portrays a story of Odette's birthday and the guests have a party to her birthday in Paris to celebrate. Sig. Aureli, as Perot, a given name by his wife, which he presents to Odette. Perot did not want to give the rose away and tries to get it back. He does only after not sending to kiss Odette. Ashe kisses her his wife sees him and the two women are about to fight at each other when a duel is arranged. The scene is changed and the women are duelling

when Perot fights his way to his wife's rescue just in time to receive a mortal wound from Odette that had been aimed at his wife. As he dies, his wife realizes her mistake. The act will be a new one to vaudeville in this city and one that is most interesting. The other acts on the bill next week are also of feature prominence. Frances Le Maire will star the bill with an act that is sensational. Miss Le Maire is a phenomenal roller and Uneyelo Skater and will introduce spectacular electrical music's skaine. Her act is original inasmuch as it is of her own creation. Kibon and Baker will be seen in a refined comedy pantomime. This act is a delightful act to men's lovers and women are about to give up the act when a duel is arranged. The scene is changed and the women are duelling

THEATRE HONORS COME VERY SLOW

Considerable Pluck and Courage Required for a Young Woman to Win Her Way

If girls who dream of honors as a prima donna on the operatic stage could hear the story of the trials, the bitter struggles and the disappointments as told by Della Rossa, the well known soprano who comes to the Empire theatre the first half of next week as a feature of the Orpheum vaudeville shows, they would hesitate and wonder whether they wish to make the sacrifice. Miss Rossa cites an example.

"Not so many years ago a friend of mine sat in an open-air beer garden in San Francisco. The clientele was not smart and the entertainment was wretched enough. Suddenly a wonderful voice made itself heard in these cheap and lavary surroundings. My friend wondered what such a wonderful voice was doing there. Although he did not know it, the singer had been heard there and in many other obscure places for years. One year later my friend sat in Covent Garden, London. The singers were artists, every one. Suddenly he heard the marvelous voice that had attracted him in San Francisco. The applause was thunderous. The voice sang again and again. My friend looked—it was Tetrazini."

"And she was not flattered by the enormous sums offered her. Had not she sung for years in Mexico, in Central and South America for a pitance? Had not she given the best years of her life to perfecting her voice, denying herself many things? Had not, her every thought and act been directed toward that goal of success? But the little girls do not see the struggle; they see only the success."

The life of every successful opera singer is much the same, says Miss Rossa—years of struggle before recognition comes. Miss Rossa is an English girl who has spent most of her life singing French and Italian opera in Europe.

feature of next week's bill. She is known over the American continent as the English comedienne that would make a splash here. She appears in the character of an English suffragette and a scream from start to finish. Miss Ordway has appeared in some of New York's prominent theatres where she won much applause for her cleverness. The added attraction for the week will be supplied by Marion Munson and company which will appear in "The Kidnapping of Bianca." Mr. Forrest is the author of the vehicle and will appear in the act as a newspaper reporter.

WILL TAKE TRAFFIC CENSUS

Saskatoon, Sept. 27.—On Friday and Saturday men engaged by the Board of Trade will keep count of all traffic over the main crossings of the C. N. R. in the city limits. The figures will then be given to the council with the recommendation that some action be taken to secure better protection to life and property. Appeal to the railway commission is asked to secure some form of protection at the level crossings.

"THE CHINESE FOUR."

Chung Hwa Chinese Four on the Orpheum vaudeville bill at the Empire theatre the first half of next week.

THRIVING CITY IN BRITISH COLUMBIA WHICH CAME INTO BEING AND GREW WITHOUT HELP OF THE RAILROADS

Fruit Farming Forms the Principal Occupation But the Tobacco Business is Destined to Play an Important Part in the Growth of the Place—Fishing and Many Other Lines of Sport to be Found for the Man of Leisure—Climate is Ideal There.

Nestling snugly midway down the far-famed Okanagan Lake in British Columbia is an incorporated city which is destined to play an important part in the development of the Garden Province of Canada. That coming great center of activity is Kelowna, whose remarkable fine fruit is already known the world over—its vineyards are in the heart of the Okanagan valley, in the fertile regions of Interior Canada. The ancient Phoenicians dreamt of a land of sunshine where conditions of life were such that everyone lived in contentment. Those venturesome voyagers have, in a local sense, their wish fulfilled in Kelowna.

The year. The autumn, when the whole population seems to be busy with the marketing of the fruit and sending it to market, is scarcely less beautiful, and the winter, the advent of which season is delayed until the summer, is comparatively mild. In a period of ten years the mean temperature has been 46 degrees Fahrenheit. Really cold weather is rare, and the occasional cold winds seldom withstand a day's sunshine.

Enormous Vegetable Production. As to the industries that have been established in the locality, prominent

there is room for a much larger population. Land companies are developing large areas of land as good as that already occupied, and their water systems for irrigation, costing millions of dollars, are as near perfection as money can make them. Rural telephone lines are scattered over the whole district, thus largely discounting any inconvenience of country life and free mail delivery furnishes expeditious communication.

The roads are under government control. Generally of a "first class" character.

Retains Fruit Supremacy. Of course, the premier position among the industries of this locality. The reputation gained by Kelowna for their

buyer must consider the cost of putting in his orchard and maintaining it for from four to seven years until the fruit comes into bearing.

Should Have Sufficient Capital. A practical question frequently asked is as to the amount of capital required with which to engage in fruit growing. Much depends on the circumstances of each case, and the experience and ability of the individual.

In general, however, it may be said that a man should have sufficient capital to meet all necessary outlay, including first payment on his land and to tide him over the first years when the fruit trees are producing no revenue. A living has been secured from a small fruit farm from the very start, but this greatly depends on the experience and energy of the grower.

Previous experience in horticulture and agriculture is valuable, but many experienced men who possess the necessary adaptability and energy have made a success of the work from the start; as other crops may be grown on the land during the first year when the young trees are growing.

Mixed Farming Important. And in this connection too much emphasis cannot be laid upon the importance of mixed farming. When it is stated authoritatively that nearly an amount of \$150,000 worth of produce was imported into the Okanagan district in one month alone, which could easily have been grown at home, it is easy to see the excellent opening in this direction.

Tobacco Grows Well. Another important industry, and one that is bound to effect Kelowna greatly in the future, is that of tobacco growing. Twenty years ago successful experiments in tobacco growing were made. With the experience of a local expert grower and of a gentleman who had successfully managed and operated tobacco plantations in South America, Puerto Rico and Virginia, a company was formed with its headquarters in Kelowna for the growing of tobacco and the manufacture of cigars. This company, the British North America Tobacco Company, Limited, last year harvested a magnificent crop from 110 acres planted, and so well satisfied were they with the quality of the leaf that a largely increased acreage has been planted this year. A modern three-story building has been erected for the handling of the raw leaf to its finished product—cigars. Some idea of the importance of this industry may be gathered from the fact that the company are now employing about 400 hands. At the present Vancouver Exhibition, 1912, this company were awarded a gold medal and diploma for their exhibit of growing plants, raw leaf, cured leaf, and manufactured cigars.

History is Interesting. The history of the growing of Kelowna is interesting. The industry was carried on for a number of years, financed in a small way by local capital, until the produce attracted the attention of the entire province of British Columbia, and called forth many inquiries from the press and trade. It is highly recommended by Earl Grey and Mr. Charnick, chief of the tobacco division, who received the highest award in the gift of the province at the Vancouver Exhibition of 1912.

Brought to the notice of a number of men quick to see a sterling opportunity in the growing of tobacco, the Kelowna tobacco company was formed, and the business is being carried on with a long experience in growing, curing and manufacturing of tobacco and cigars. In addition to the growing of tobacco, the Kelowna tobacco company are also engaged in the growing of fruit and the manufacture of cigars.

Carried World's Apples Prize. In competition with all Canada and the United States of America at the National Apple Show held in Vancouver in October, 1910, for a prize for the best carload of apples of any kind, Kelowna, out of 12 carloads exhibited, carried off the coveted trophy and a cash prize of \$1,000; and again at the same exhibition, Kelowna's district display was awarded a cash prize of \$1,000, besides a vast number of lesser trophies. Judge Van Buren, the foremost pomologist of the Pacific States, gave Kelowna's carload a perfect score of 1,000 points and stated that it was the finest carload of apples ever exhibited. It consisted of 72,000 perfect apples.

At the recent New Westminster Exhibition in September, 1912, in the five box exhibit case, out of 13 first prizes, Kelowna won 10 firsts, nine seconds and 10 thirds. In the one box exhibit, out of 21 first prizes Kelowna captured 19 firsts, 19 seconds and 13 thirds. Thus up to date is conclusively proved the superiority of Kelowna's fruit.

Win Wherever Exhibited. Diplomas, medals and cash prizes have been the result of Kelowna's exhibits wherever made from 1902 to date. Commenting on the exhibits made at the Vancouver annual exhibition in 1912, the Saturday Star has the following: "The fruit growers of Kelowna and district sent an exhibit of fruit which undoubtedly outclassed anything ever seen in British Columbia. It included a carload of apples, pears, peaches, plums, cherries, apricots, apples, crab apples and tomatoes. These were arranged in such a way that the exhibit drew all eyes. Vancouver owes thanks to the Kelowna district for such a splendid display."

Small Farms Predominate. The majority of fruit farms are in small holdings of 10 to 20 acres. For undeveloped lands prices run from \$50 to \$150 per acre. For developed lands, the price is \$150 to \$200 per acre, and under some irrigation system, prices vary according to location and ripeness of the fruit.

Orchards in the first and second years of bearing may be had at about \$200 per acre, and as high as \$1,500 per acre for full bearing trees. If unplanted lands are purchased, the

A Letter from an Edmonton Man:

Dear Sir—

When in Kalowna a few days ago I went at the request of a gentleman who had bought two of your building lots in the town to see just what the property was like.

I have great pleasure in saying I found it very good and exactly as you represented it to him.

Your prices are better than those to be obtained in Kalowna and your property is the most desirable residential site from which there is a perfect view of the lake.

There is no doubt in my mind that my friend or any one else who has bought in that property will make money from their investment.

Yours faithfully,

F. C. Kruckeberg
150 Kemp Street, Edmonton

way the lot of 28 cents, per pound on imported raw leaf, the Dominion Government finding the crop worthy of this step within a short period, and the probability is that this will be increased. Pure-bred Cuban tobacco opportunities are being offered in the province of British Columbia, the recognized high grade material for binders, and the high bred Sumatra under shade tent for wraps, showing a saving in actual results plus the duty of 32 cents, 38 cents, and 18 cents, per pound respectively.

The British North America Tobacco Company, Limited, will purchase the same way fruit and produce dealers and already there are a number of people engaged in this occupation in addition to their fruit and vegetable growing.

Will Increase Facilities. The Kettle Valley Railway, when completed next spring, will also give increased facilities, especially to the Kelowna district.

Numerous Sports. Again, don't grow anything. Your circumstances may permit you to retire from the crowded area of producers and you want relaxation. Is it sport? There is fishing in a lake which extends for nearly 80 miles and has many flourishing towns on it. There is shooting and hunting, riding, driving and motoring in a district that has the greatest amount of government roads in the province, polo and cricket, tennis, football, baseball and lacrosse, all are represented in teams and clubs. Is it scenery that you desire? There are views you may travel far to Europe to equal, but hardly to best. A diversity of interest is a big claim to make for true diversity means so much—so many branches, so many directions has the mind of man—but this end nature has been so abundant, so lavish. The plant and interior of the Kelowna Canning Co. Fruit growing is the chief industry in this section and this company handles many tons of fruit every month.

comparative in more modern lines in men who, owing to economic circumstances or otherwise, have been driven to a new country where at least it is not a mere clerical manner of the survival of the fittest.

Tobacco Kelowna. "The Orchard City of the Okanagan," as it is familiarly known, has a population of nearly 3,000, with about an equal number in the outlying districts, and its growth is rapidly increasing year by year.

Figures Talk Best. It may be well to give a few facts and figures by way of establishing an angle of view between the reader and the subject of this article. Already Kelowna may claim to be "the most modern" as the cities of the interior of British Columbia, as it had a total property assessment in 1912 of \$2,600,000, and according to official figures, from the first of January to the first of June this year, the building permits have increased 117 per cent.

This, according to the Financial Post, places Kelowna first on the list in increased percentage in building permits for Western Canada, and second in the whole Dominion.

Freight Revenue Increases. The annual freight revenue to the C.P.R. for last year amounted to \$2,125,256, as compared with \$2,038,351,77, or 56 per cent. The increased freight revenue in 1911 was \$1,832,728, compared with \$1,712,428 last year an increase of 829,008, or 48 per cent. While the passenger traffic for 1911 amounted to \$84,874, 29, as against \$61,535,01 last year.

Its electric light and water plants are owned and operated by the city council, which also furnishes electric power. The tested pressure of the water works is 120 lb., and the city, together with an excellent fire brigade, ensures sufficient protection in case of fire. Business is the present and future of Kelowna have been given by three of the Canadian banks which have established local branches in the city. There are also two local newspapers and a local loan and investment company.

Progress Ideal Climate. In the important consideration of climate, Kelowna possesses many of the conditions which in other portions of the world are found in a more moderate form. The heat, the moderate the heat of summer, and the nights are a pleasant surprise, and cool, spring, which comes early, is mild and exhilarating, and a feature of this season is the delightful breeze from the blossoming fruit trees. It is a wonderful sight when the myriad of trees dress in their brilliant colors of red, pink and white which are promise of an abundant crop later in

the year. The autumn, when the whole population seems to be busy with the marketing of the fruit and sending it to market, is scarcely less beautiful, and the winter, the advent of which season is delayed until the summer, is comparatively mild. In a period of ten years the mean temperature has been 46 degrees Fahrenheit. Really cold weather is rare, and the occasional cold winds seldom withstand a day's sunshine.

Enormous Vegetable Production. As to the industries that have been established in the locality, prominent there is room for a much larger population. Land companies are developing large areas of land as good as that already occupied, and their water systems for irrigation, costing millions of dollars, are as near perfection as money can make them. Rural telephone lines are scattered over the whole district, thus largely discounting any inconvenience of country life and free mail delivery furnishes expeditious communication.

The roads are under government control. Generally of a "first class" character.

Retains Fruit Supremacy. Of course, the premier position among the industries of this locality. The reputation gained by Kelowna for their

buyer must consider the cost of putting in his orchard and maintaining it for from four to seven years until the fruit comes into bearing.

Should Have Sufficient Capital. A practical question frequently asked is as to the amount of capital required with which to engage in fruit growing. Much depends on the circumstances of each case, and the experience and ability of the individual.

In general, however, it may be said that a man should have sufficient capital to meet all necessary outlay, including first payment on his land and to tide him over the first years when the fruit trees are producing no revenue. A living has been secured from a small fruit farm from the very start, but this greatly depends on the experience and energy of the grower.

Previous experience in horticulture and agriculture is valuable, but many experienced men who possess the necessary adaptability and energy have made a success of the work from the start; as other crops may be grown on the land during the first year when the young trees are growing.

Mixed Farming Important. And in this connection too much emphasis cannot be laid upon the importance of mixed farming. When it is stated authoritatively that nearly an amount of \$150,000 worth of produce was imported into the Okanagan district in one month alone, which could easily have been grown at home, it is easy to see the excellent opening in this direction.

Think England Should Have Gov. Sport Department

Prominent English Sportsmen Give Opinion on British Sport Conditions—Say Stagnation and Cliques Responsible for Present Low Standard of Athletics.

London, Saturday, Sept. 27.—That England must have a Minister of Sport, the head of a properly organized government department if she is to be able to rival the athletic prowess of the United States, is the opinion of many prominent sportsmen here, who are of the opinion that the present state of British sports is due to stagnation and cliques. The view of many prominent sportsmen here, who are of the opinion that the present state of British sports is due to stagnation and cliques. The view of many prominent sportsmen here, who are of the opinion that the present state of British sports is due to stagnation and cliques.

The reason is that despite the boasted democracy of sport amateur athletes in England are controlled by the aristocracy and it is always a case of the poor being asked to play while the rich play. When the Duke of Westminster, Lord Grey and Roberts, and Lord Rothschild, Strathmore and Harewood, who probably controlled the fact that the Olympic games were held in London, were the object of subscription to a fund which would eventually be handed by aristocratic associations, which have been for years past, in amateur sport.

Not only do the six noble sports, for they are all recognized as noble sports, but the public are asked to play while the rich play. When the Duke of Westminster, Lord Grey and Roberts, and Lord Rothschild, Strathmore and Harewood, who probably controlled the fact that the Olympic games were held in London, were the object of subscription to a fund which would eventually be handed by aristocratic associations, which have been for years past, in amateur sport.

A good example of this is provided by the rules of the Amateur Athletic Union, which controls the Olympic games, which is a definition of an amateur is: "No person shall be considered an amateur who has received any remuneration for his services in any of the sports mentioned in the Olympic program."

It is surprising that the public should be asked to play while the rich play. When the Duke of Westminster, Lord Grey and Roberts, and Lord Rothschild, Strathmore and Harewood, who probably controlled the fact that the Olympic games were held in London, were the object of subscription to a fund which would eventually be handed by aristocratic associations, which have been for years past, in amateur sport.

How to Ascertain If You Have Catarrh

Look for Symptoms of This Treacherous Disease in the Following List.

"Is your breath bad?"
"Is your throat sore?"
"Do you cough at night?"
"Is your voice hoarse?"
"Does your nose stop?"
"Have you nasal discharge?"
"Do you spit up phlegm?"
"Has your nose an itchy feeling?"
"Have you pain across the eyes?"
"Do you have a headache?"
"Do you sleep with mouth open?"
"Are you subject to sneezing fits?"
"Do your ears ring and buzz?"
"Are you hard of hearing?"
If you have any of these indications of Catarrh, stop it before it gets into the lungs or bronchial tubes—then it may be too late. The remedy is "Catarrhine," a direct, breakable cure that places antiseptic balsams and healing medication on every spot that is tainted by catarrhal germs.

"No one can know better than I the enormous benefit and relief from the very first day's use of Catarrhine," writes T. T. Hopkins, of Westvale, P. Q. "I had had years a stubborn case of bronchial catarrh, ear noises, headache, sore eyes, stopped-up nose and a general feeling of discomfort, which was cured by Catarrhine."

The Catarrhine outfit lasts two months, and is guaranteed; smaller size, 50c; sample size, 25c. At all druggists and health stores. The Catarrhine Co., Buffalo, N. Y., and Kingston, Ont., Canada.

CANOE CLUB NOW

LIMITED COMPANY
During Winter Months Club Will Give Extensive Social Programme.

A largely attended meeting of the Edmonton Canoe Club was held in the offices of Hyndman and Hyndman last Wednesday evening, and a great deal of important business was transacted by the fifty and members who were present. The charter was placed before the members and accepted, and the club is now a limited stock company, with an authorized capital of \$10,000. Two hundred and fifty shares at \$40 dollars each have been placed before the public and are practically all sold up. The stock will then be taken off the market.

The officers elected under the new charter are as follows:—Honorary president, Lieutenant-Governor, Vice-president, A. P. Davis; Secretary, H. P. D. Trickey; Treasurer, R. McRobb; Treasurer, R. W. Henry; Secretary, J. M. Knowlton; Board of Directors: A. S. Mathewson, W. C. Levermore, E. R. Scott, and J. L. Laidlaw.

Since the organization meeting six weeks ago the club has developed very rapidly and memberships will soon be closed for this year. The new club house is well under way and the contract calls for finishing in three weeks time, when a formal opening will take place. If the weather permits this opening will include a regatta and dance.

During the winter and spring months the club will run an extensive social programme, with several dances and stag and card parties, etc.

The club, which is primarily for the fostering of all water sports, certainly should have a brilliant future, for the officers are also prepared to help along any line of sport that the members decide upon entering into. The field is unlimited, for there is absolutely no club in Edmonton that has proper accommodation for the young man who is inclined to enter into clean, healthy sport.

PROSPECTS ARE BRIGHT FOR BIG SPORTS DAY

Public Schools to Hold Preliminaries to Choose Representatives for Big Meet October 3.

Next week will be a very busy week for the athletes of the Public Schools and High Schools of the city. The annual Sports Day comes on Friday, October 3. Judging from the preparation being made and the close which the entries are showing, it will be the best ever held. In order to expedite the running off of events on that day and to keep the list of entries down and still give everyone a chance, it was decided this year to hold preliminary meets at all the schools, the winners to represent the schools in the main Sports Day Meet. Most of these preliminaries were held yesterday. All the schools report excellent showings in all departments, and the prospects are good for making many new records.

As the program for Sports Day is too long to run off in one afternoon, the cross country events will be on Monday, and the jumping events, on Wednesday. The program for Wednesday and Friday, and also the 1913 football schedule, will be published in Monday's Capital. Following are the events which will take place Monday:

1—Cross country run (3 miles). Record 18 min. 9 sec.

2—Cross country run (3 miles). Jr. H. S. Record 18 min. 52 sec.

3—Cross country run (3 miles). Sr. H. S. Record 17 min. 57 sec.

GIANTS' BAD LUCK

ARRIVES ON TIME
Larry Doyle, New York's Brilliant Second Baseman, Hurt in Auto Accident.

Brooklyn, Sept. 27.—The supporters of the New York Giants, in the world's series, had doubtless yesterday when they learned that Captain Larry Doyle had been injured in an automobile accident, and that Fred Snodgrass had sprung a charlie horse in the game at Ebbets field. Both are not likely to play again for a week and may be out of the series with the Athletics for the world's championship.

Doyle received his injury last night as he was driving home in the automobile he won as the best all around National league player of 1912. Pileup between Doyle and a passenger Doyle became bewildered by a fog and steered the machine into a tree. Doyle was thrown out on his right shoulder. Snodgrass escaped, with only a slight shaking up.

Doyle did not realize until this morning that his fall had possibly injured him seriously. A physician said the right arm was broken, and the leg was possibly broken. Manager McGraw said he would have Doyle played under the X-ray.

The manager opened the game today with a single to center and sloped up turning first. He batted around a mile and then retired in favor of Cooper.

LOCAL BUYERS FOR GARDEN REAL ESTATE

Cardston, Alta., Sept. 27.—The sale of a few days ago of four Cardston lots within one block of the proposed temple location has awakened local interest in local real estate circles, and is looked upon as signalling the opening of a brisk movement in the lots, inside property this fall.

The interest in the lots in question changed hands at \$200 each, the purchasers being Cardston citizens. It is pointed out that many similar transfers have been recorded during recent months for the account of local parties and that the advances in values observed really values in the immediate neighborhood, is now regarded as having been somewhat underestimated earlier in the season; and insiders state that the present is likely to prove only the beginning of a very active development period for Cardston and the Cardston district.

NEW WEALTH AND PROSPECTIVE

Scott, Sask., Sept. 27.—From estimates given by the Laidlaw and Development Co., who have been instrumental in bringing many hundreds of acres into this section of the west, it appears that the average financial responsibility of the new settlers is about \$10,000. This means, according to the Laidlaw and Development Co., that the average settler coming into the district is of the permanent and substantial kind. In fact, in the Laidlaw and Development Co. of any community in which they locate, not to mention the enormous volume of new wealth that such settlers actually create from the soil, beginning with the first year of residence. The rapid development of the rich agricultural territory surrounding the town of Scott is proof of the notable features of the year in this section of the province.

See Summerland any day 10 a.m. or 2 p.m. 36 Jasper Ave. E. Free auto trip.

SPORTOGRAPHY.

INDIANS PLAYED FOOTBALL

Princeton and Rutgers, in their gridiron contest today, will revive memories of the first intercollegiate football game in America, played by the teams of these colleges in 1869. Although this contest marked the beginning of the development of a new and original type of football out of the old rugby game, the history of American football commenced long before that—in fact, before the distinguished C. Columbus discovered America. The "original" football of the Indians was often played between teams of squaws and bucks, and such a contest, held at Wapoketa in 1706, is described by Judge Burnett, a pioneer Ohio jurist, in his book, "Notes of the Northwest."

"At these games the men played against the women, and it was a rule that the former were not to touch the ball with their hands on penalty of forfeiting the purse, while the women had the privilege of picking it up, running with it and throwing it as far as they could. When a squaw had the ball the men were allowed to catch and shake her, and even throw her on the ground, if necessary, to take the ball from her hand, but they were not allowed to touch or move it, except with their feet. At the opposite extremes of the lawn stakes were erected, and the women up the other. The stakes arrayed themselves in front of these stakes, the men on one side and the women on the other. The party which succeeded in driving the ball through the stakes at the goal of the opponents were proclaimed victors and received the purse. All things being ready, the old chief went to the center of the lawn and threw up the ball and the contest began. The stakes seemed to be fairly matched as to numbers, having about 100 on a side. The game lasted more than an hour with great animation, but was finally decided in favor of the ladies, by the capture of a 'herring' square, which the ball and in spite of the men who seized her to shake it from her upturned hand, she finally dragged them along till she was sufficiently near the goal to throw it through the stakes. The crowd then burst into a shout of triumph, and the men, who were so near the goal, were thrown to the grass."

BRIGHT OUTLOOK FOR DEBENTURE SALE

Brandon, Man., Sept. 27.—A bulky package of booklets forwarded by the Brandon Commercial Bureau to the Harris Trust Co. at their New York and Chicago headquarters is now being distributed among the clients of the financial house for publicity purposes in the bond sale now being negotiated. It is expected that the resulting publicity from the wide circulation of this literature in the States will prove of permanent value to Brandon's industrial growth, to say nothing of the promised outcome of the debenture issue. Brandon's present growth is steady and consistent, and is believed to be of a nature to interest both large and small buyers of high-grade municipal securities.

Meanwhile, municipal securities have a notable existence. The financial strain of the past months, being experienced in Brandon business circles, the improvement being after all in an important degree to the section. The present indications is that, should, point to a marked revival of industrial activity in an early date, and numerous reports of new industries to be established here are already being given out.

BUILDING MATERIAL IN DEMAND

Grand Forks, B.C., Sept. 27.—New developments at Grand Forks are following one another in quick succession this season, displacing all predictions of doubters and alarmists of a few months back. Work is now going forward on the new Kingston hospital and the building should be ready for occupancy soon after the first of this year. The aggregate of new building, this year in Grand Forks, this year promises to exceed all past records, and the demand for building materials has been increasing steadily. The Western Pine Lumber company, limited, has already planned to take out nine million feet of logs within the next few months. The camps of this company are situated along the tributaries of the Kettle river within a few miles of here. Among the other important buildings now nearing completion is the new post office that is being erected at a cost of \$45,000, and which will be opened to the public early in October.

BUSINESS MEN'S TRIP PLANNED

Saskatoon, Sept. 27.—The proposed trip for Saskatoon business men is expected for October 2 and 3. The route to be followed is to Coquiton on the O. N. R. change there to the O. P. R. to Moose, and Outlook and then return to this city.

See Summerland any day 10 a.m. or 2 p.m. 36 Jasper Ave. E. Free auto trip.

CAN MY STALL A

NEW CHALMERS SIX

Feature of 1914 Model That Is Attracting Much Attention

A feature of the 1914 Chalmers "Six" that is attracting much attention among motorists is the Chalmers-Fitz electric starter which gives the car the distinction of a non-stallable motor. The non-stallable feature of the motor is regarded as one of the greatest automobile improvements in years. Should the driver fail to give the motor sufficient gas after throttling down and starting up again in going through heavy traffic or over a bad piece of road, the motor will pick up the instant the clutch is released to engage the gears. The Chalmers engineers in all their experiments have never been able positively to stall the new motor. This feature is made possible by the application of the electric starter which is always in positive connection with the motor of the car. The starter is manufactured complete, except the storage battery, in the Chalmers factory. The expense of installing an electrical device exclusively for the making of the starting system was over \$60,000. The Chalmers-Fitz starter is a very simple. Only one motion, that of throwing a knife switch on the dash, is necessary to start the car. The one switch also controls the ignition, which in every way is separate from the starter. The system, the single system Bosch magnets, benz used. The starter switch is left open while the car is running.

The starter is also silent in its operation. Turning a motor over at 100 revolutions per minute there is none of the "burring" sound which characterizes the older types of electric starting systems. The system also provides for unusually powerful electric lights, horn, headlight, and inspection lamp, electric heater, or other electrical equipment.

Remember that a popular, stylish car is easy to turn into money. And that no buyer will pay for a "back number."

STUDEBAKER CAR GOES THROUGH WAR

Is Bone of Contention in One of Bloody Mexican Battles

Brownsville, Tex., Sept. 27.—In a battle of countless men engaged, the bloodiest battle yet fought in the present series of Mexican civil wars was the one which General Blanco, of the Carranzistas, recently brought on at Metamoros.

The words for which Blanco's army and the federal troops fought to the death was an American-made automobile—a vintage Studebaker car. That had become famous throughout the feud-ridden deserts of north-central Mexico, first in the service of Diaz, then of Carranza.

Blanco won the battle and the automobile. Incidentally, he came into possession of the city of Metamoros, which he has since fortified as a revolutionary stronghold. After spilling of blood, the Studebaker, chauffeur, Simon Gonzalez has always driven the car. He is indifferent to little matters like changes of ownership. All generals look alike to him. With Gonzalez at the wheel and a heavily armed escort of six or seven men clustered on the running boards, General Blanco daily leads his troops across the trackless desert, inspecting his outposts and guarding against federal attacks.

General Gonzalez, however, Monterey is getting ready to come back for "his" automobile. In the meantime he has notified Louis Bracy, Studebaker dealer in Brownsville, Tex., who sold the car, that it has been "taken" and that he would like to have the ownership by giving the motor number—16518. He wants Bracy to look the car neither comfort nor concern.

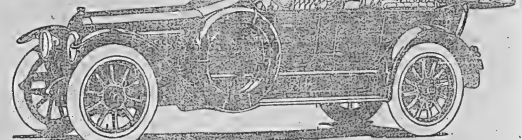

Up to date, Bracy has refused to identify himself with the car, party, there having been no occasion for mechanical or other attention to the car. Despite the terrific service asked of it.

Tonight H. Howard plays Abbott & A. Howard plays Stewart and the big match of the evening will be the match between Drayton and Kelly for \$100 a bet.

Farrier who is selling as referee of the tournament has taken a shabaz to the final winner for a match with side bet of \$50.

PUBLIC SCHOOL FOOTBALL. Norwood beat Alex Taylor—score 10 to 0. McCauley beat Oliver—score 1 to 0. McKay beat Parkdale—score 1 to 0.

HUDSON Six 54, \$2950
Jack Darnell, Day Paid

Ask Any Six Owner If He Would Go Back to a Four

HE would as soon go back to candles after using electric lights. Vibration disappears when you ride in a Six. Rough roads and smooth, hills and valleys, ruts and asphalt are alike to the six-cylinder motor. Jerks and jars no longer annoy and fatigue. Bumps are gone. You glide instead of bouncing.

Lasting Value of HUDSON Six 54

BECAUSE it is a six-cylinder car, and equipped with the wanted streamline body, the HUDSON Six 54 is a good investment.

It will give you all you can desire of motor satisfaction. And will retain a used-car value sufficient to hold your annual motor-car outlay at a low figure.

For best in mind that depreciation in selling value of your car is more important to consider than even tire and gasoline expense.

Remember that a popular, stylish car is easy to turn into money. And that no buyer will pay for a "back number."

Kenosha, Wis., Sept. 27.—"Wild Cat" Ferns of Kansas City, had the better of "Billy" Walters, of Chicago in their 10 round bout here yesterday. Ferns was carrying the fight to the naval champion most of the evening.

In the early rounds the fight was even, but Ferns had the advantage in the closing rounds.

In the city pool tournament at the Empire pool rooms last night, Kenosha put up the best exhibition thus far in the tournament when he beat his 100 points while his opponent, Brown, was getting 13. Burns made one run of 21 balls. Layman defeated Taylor by the score of 85 to 34. Williams won from Kaufman by default.

Plank of Athletics Pitching Thirteenth Year in Majors

Veteran on Whom Connie Mack Will Depend in World Series
Has Envious Record as a Pitcher—Is
in Matthews's Class

This is Edward Plank's thirteenth year in the American league and his thirteenth season as a professional pitcher.

The traditional unlucky number 13 hasn't bothered Mr. Plank's pitching arm to any noticeable extent, for the hours of that many seasons' battling against the great swarmsmen of the American league has experienced one of the best years of his long and successful career.

For 15 years the mighty arm of the "gashy-bug" wonder has shot through deceiving hooks and baffling benders over and over enough to the plate to foot all batters most of the time, and some of them all the time. During this time, Plank has been and is today regarded as the most remarkable hurler of all those who throw a ball from the port side.

He shares the honor with Guy Harris White, of the Chicago White Sox, in holding the record in point of service. These two staid and sterling left-handers have served more time in the majors than any southpaws in the history of the game. The great Theobald Mathewson held a job in the "big show" for 11 years, but the above-mentioned stars have the famous Theo shaded by two seasons.

This season is Plank's banner year in many respects, though he has slumped lately, and that is saying much for the star southpaw of the American league has had some wonderful years, but this season Edward Plank is a man nearing his 29th birthday, and this fact makes his performance all the more wonderful.

First 20 Games Good

He pitched the best ball of his career in the first 20 games he hurled this summer, and no pitcher, young or old, had anything on the veteran Mackman's work for that period. The sum total of 97 hits was registered against his delivery in the first 20 games, he also placed six shutouts consecutively to his credit, and of these 20 games he won 17.

He experienced a slight slump during the latter part of July and the fore part of August, and lost five games in a row, although not hit so very hard. But on August 25th he showed that he still possesses all the stuff he ever did by dominating the St. Louis Browns in a most refreshing manner. He shut out St. Louis's men and whiffed 11 men, which is going some for an athlete of his years.

This shows his power to deceive batters; has not lessened, nor has his speed diminished to any noticeable extent. His famous cross-fire delivery, which has perplexed and puzzled the best of batters for a dozen years, is his best asset. This patented delivery is Mr. Plank's yet an unsolved problem, an unsolved mystery.

Saves His Arm

Plank, like all veterans of class and brains, is using every known means and device to save his arm; he makes every ball count, he wastes no time

with the heavy artillerymen of the game. Experience has taught him to make the recognized slugs hit a bad ball. If possible, taking a chance on it going into the "foul" hands. He then turns all his skill on the raw recruits and ordinary hitters.

Some, or rather many of these chaps haven't made a hit off Sir Edward's pitching all season, and as this class of players are in the majority, Plank has solved the problem of how to make pitching easy. He has won many of his games against the hard hitting teams of the circuit. On May 22 he held Detroit to a handful of singles and shut them out; he followed this up by blanking Washington and leading the Nationals down to a couple of very suspicious slanders.

That Mr. MacGillivray, his manager, is banking on Edward Plank and his deadly cross-fire materially to assist in routing the Giants is no idle talk. The astute and austere Mr. Mack well remembers how his favorite southpaw, in the world's series of 1911, put the Indian sign on J. McGraw's hand of Giants and drove his star left-hander "Rube" Marquard to the limbo. It was a grand pitching duel. Plank's work after the second inning was almost perfect, just 32 men coming in to bat.

Only One Poor Year

Plank's pitching record shows what a truly wonderful hurler he is, for in just one season did he perform in an ordinary manner. In 1908 he made a poor showing in the win column, having a percentage of .467. In no other season did he fall below the 500 mark. In less than half a dozen games out of the 422 in which he appeared have the opposition made the double number in runs.

AMERICAN HORSES ACROSS THE POND

Many Millionaire Horsemen in
States Have Stables
Abroad.

At various times in other years American horsemen have sought European countries to try their horses with the best in England and on the continent, and have always had a fair measure of success. As far back as 1856, Richard Ten Brook took over Pryor, Lecompte and Priores and won some of the most important stakes. P. Leathers frequently maintained a winning stable in England, and was one of the few American owners to win the Derby, which he did with the great son of Eminence, Troquois; the late Hon. W. C. Whitely, ex-secretary of the United States navy, and Richard Croker, Tammany chieftain, being the other two.

Messrs. August Belmont, Sr. and Jr. have always had winning representatives abroad, and Mrs. J. B. Keene was successful with such horses as Foxhall, Blue Grass, Cup and Bell, Charcoal, etc. Edward Corrigan, the master of Hawthorn, returned after a campaign in England well laden with British gold. Duke and McCafferty with Helen Nichols and others, and Dwyer brothers with a good stable, won their share of the races abroad, but these gentlemen and others simply shipped over good race horses, ready to race, as a sport, for the honor, acquired or as a business proposition. It was not until after 1904, when the drastic laws began to lure the horse-breeding industry all over the United States, that the exotic became an invasion. Stallions, brood mares, yearlings and horses in training were sent over by the ship load, even as far away as the Argentine Republic and distant Australia, entailing great financial loss to the breeding interests of this country that will take years to replace.

Men of capacity, business ability, great wealth and world, famous in all of the different lines of achievement, have been compelled to seek their pleasure in this line of sport, and maintain their racing establishments and spend their money in foreign lands.

Such men as W. K. Vanderbilt, Frank J. Gould, Harry Payne Whitney, H. D. Duquesne, August Belmont, Thomas H. Hitchcock, Joseph B. Woldner, Henry Ziegler and a host of others have participated in this sport, and their purses, lines and everything agreeable, and no effort is spared to make them welcome and enable them to stay and continue racing on the other side. All of the American trainers and jockeys abroad are doing well. Bobb Darroll is almost in partnership with the king of Roumania, and it would not be surprising if the king would confer a title upon him. Eugene Leitch, Billy Duke, Emmet Wishard, Glen Brown, Sam Hildreth, Tom Walsh, Frank McCabe, Frank Vanness, Fred Berlew, Johnny Hyland, Johnny Campbell and other prominent American trainers who helped to develop the American thoroughbred in this country were compelled to go abroad to engage in the profession they had chosen for a life work.

WANTED, PEOPLE AT 10 A.M. & 2 P.M. to go out to the new town, "Summerland," Lots \$175, \$100 cash and \$75 a month, or \$125 cash and \$25 every 1 month, final payment, 25 months, S. F. Munson, Broker, 36 Jasper Ave. E.

Permits Taken Out For \$65,000 Worth of Houses

Inspector's Office Had Busy Day Monday—1913 Building Record Promises to Keep Up With Pace Set During Past Years—\$13,100 for South Side

On Monday exactly \$65,000 worth of building permits were taken out in Greater Edmonton. That means that on both sides of the river considerable building is anticipated this year, therefore the construction program of 1913 will finish up as bright and rosy as any previous year.

All the permits issued by Building Inspector Melvor are for the erection of dwellings. Not one permit calls for the construction of a business block. This is accounted for by the fact that in the early part of the year

Come any day at two o'clock and have a free auto ride to see this new town. Any time of day by appointment.

nearly all the permits were for blocks and stores, thus the construction during the spring and summer months have been of the heavy order. Of this total sum, \$13,100 represents the building activity on the south side of the river, while the remaining \$52,500 is for construction work on the north side. The largest permit issued for the old portion of the city, otherwise the north side, was given to S. F. Munson, which calls for the erection of a number of dwellings in Summerland, amounting to \$23,000.

SUMMERLAND
